Power outages

1 Aug to 31 Oct 2026 (2026-08-01 to 2026-10-31, Pacific/Auckland)

7 of 12 sites had a power outage between 1 Aug and 31 Oct 2026: 14 outages, 24 hours in total.

A power outage is only recorded where a UPS on-battery contact is wired to the gateway and its input is switched on. By the gateway settings held in the cloud, that input is switched on at 12 of 12 sites.
An alarm is counted in the range it was raised in, at the site its gateway was at then. Its time runs until it cleared, or to the end of the range when it had not cleared by then.

Sites	12; 7 with at least one, 5 with none
Alarms raised	14
Time active	24 h in total; the longest 5.5 h

SITES WITH THE MOST

BY ALARM

Alarm	Level	Sites	Alarms	Time active
Mains power is off at the site	Fault	7	14	24 h

MONTH BY MONTH

Month	Alarms	Sites with at least one
August 2026	2	2
September 2026	2	2
October 2026	10	5
